

TWO NEW SECURITIES TO BE ISSUED BY U. S. GOVERNMENT IN 1921

Treasury Will Provide \$1 and \$25 Savings Securities to Meet Demand

Two entirely new United States Government securities will be issued in 1921. They are a \$1 Treasury Savings Stamp and a \$25 Treasury Savings Certificate. The decision to issue these securities comes as a result of the savings campaign carried on by the Treasury Department during the present year in industrial plants throughout the country. This campaign has demonstrated that workers like a \$1 unit for saving and that they also are seeking an investment security of the \$25 denomination.

The new \$1 Savings Stamp will be bright red in color imprinted on green tint and will bear the head of Alexander Hamilton. This is the first time that the first Secretary of the Treasury has been fittingly honored by having his portrait on a Government Savings security.

The new \$25 Savings Certificate will be similar in design and terms to the Treasury Savings Certificates of \$100 and \$1000 maturity value, although of different color.

The 25-cent Thrift Stamp have obtained so strong a foothold in the schools of the Nation that their issue will be continued in 1921, not only to encourage saving and wise investment, but also to give American youth the opportunity of becoming an active partner in the great business of his or her National Government. This should go far to create habits of financial strength and practical patriotism throughout the Nation.

The 1921 Savings Stamp of \$5 maturity value will be larger in size than the 1920 issue, will be orange in color and will bear the portrait head of Lincoln.

The Treasury Savings Certificates of \$100 and \$1000 maturity value also will be continued in 1921. They are peculiarly adaptable for the investment of small trusts and surplus funds or surpluses, as they are not subject to market-price fluctuation, and are being extensively used for the investment of surplus funds of unions, fraternities and other organizations, subject to the limitation to holdings of \$1000 maturity value of any one series.

Plans are actively under way to make the influence of the Treasury Savings Movement felt in every branch of American life. To this end the three functions of the Savings Organization, namely, the development and protection of the secondary market for all war issues of Government securities; the sale of Treasury Savings securities; the making permanent the habits of regular saving and investment in United States Government securities will be intensified.

Despite the comparatively small sales of Savings securities in 1920, due to obvious conditions, the Treasury

Department feels that the work done by the Savings Division in promoting habits of thrift and saving; in keeping War Savings securities in the hands of investors and in acquainting the people with the desirability of holding their Liberty Bonds and Victory Notes and purchasing additional amounts at current market prices, has been one of the most important factors in the bettering of national financial conditions.

The Treasury Department earnestly asks for the Savings Movement in 1921 the cooperation of all who believe in national thrift and in the benefits of universal and wise investment.

TOURIST BUREAU TO MAKE OWN PICTURES

The Hawaii Tourist bureau intends to be independent in the matter of moving pictures. It proposes to make its own.

To this end George T. Armitage, secretary of the bureau, is now negotiating for a moving picture camera, and the intention is to engage an operator who shall be ready at call to take whatever is wanted.

The bureau furnishes films showing interesting and beautiful scenes and scenery of the Hawaiian Islands to steamship companies, tourist bureaus, lecturers, study clubs and educational institutions.—Advertiser

YOKEL-KINJO BOUT BEING ARRANGED

The challenge issued by Mike Yokel winner of the middleweight championship belt in Worcester, Massachusetts, this year, to wrestle Kinjo Ikeda, champion of Hawaii, has been accepted and negotiations are now under way, between the managers of the two mat stars. It is expected that Yokel will arrive here in January and the match will be staged in the first part of that month.—Advertiser

NEW REVENUE CUTTER ARRIVES; TO BE USED IN PATROL DUTY

The Eagle boat Earp, one of a number of similar vessels built during the war for the government by the Ford Motor Car Company, arrived in Honolulu last Monday. The new boat will be placed at the disposal of custom house officials for patrol duty in connection with opium smuggling or rescue work.

The Earp is attached to the coast guard division at San Francisco, although her permanent station will be at Honolulu. The boat is 200 feet long, with a beam of 25 feet. According to officers of the boat, five of the Eagle type are to be sent to the Territory for duty in the near future.

The Earp came here from Mare Island. The boat carries two four-inch guns and one anti-aircraft gun. The Earp is propelled by steam and is capable of making a maximum speed of 18 knots. The boat is under the command of Lieut. Commander C. F. Howell.—Advertiser.

In Grateful Appreciation

of the many favors shown us in the past we wish each and everyone a very

Merry Christmas

RED TRAIL OF THE IRON EATER

MILLIONS of dollars a year go to utter waste in the form of iron rust, yet there is an iron made that does not rust. It is Armco.

Armco was evolved after the expenditure of no end of time and money. Samples of iron used in ancient times—and which showed no signs of the modern curse of rust even after centuries of exposure to mud, water and the air—were analyzed by expert chemists.

They proved to be iron—just iron.

But it was iron without impurities, blow holes or flaws.

It was found that rust was the result of electrical action set up by foreign substances in modern iron, especially when carelessly rolled.

The next thing was to produce pure iron. Of course it could be done, but to do it commercially was the problem.

How the American Rolling Mill Co. solved this problem and placed within the reach of every user of iron a product 99.84% pure, is set down in iron annals as marking an epoch.

Remember that pure iron does not rust. Armco is absolutely guaranteed 99.84% pure ingot iron, and the effect of rust on it is so slight as to be of no consequence.

WHOLESALE DISTRIBUTORS

This mark guarantees iron to be 99.84% pure and to resist rust longer than any steel or other iron made. If required, a bond will be furnished to back that guarantee.

Certain-teed Roofing at Punahou for 8 years

Eight years ago the laundry and carpenter shop at Punahou were roofed with Certain-teed mineral-surfaced shingles. Although this school campus receives considerably more than the average amount of rainfall experienced by most of Honolulu, the roofs of these two buildings have never required attention of any kind; they have neither leaked nor been painted, and appear to be good for a great many more years' service.

Your best guide for buying roofing for either large or small buildings is the experience of others.

Certain-teed Roofing is giving satisfaction the world over.

Certain-teed greatly reduces building costs—unskilled labor, by using ordinary care, can lay it quickly. Its price is lower than most modern forms of roofing. It is waterproof, weatherproof, fire-retarding and spark-proof.
